What is Microsoft 365 Copilot?

The Microsoft 365 Copilot system

- Represents a new work paradigm, fostering collaboration between AI and employees
- Aims to transform work in the digital age
- Powered by LLMs and utilizes Microsoft Graph data
- Offers seamless integration with Microsoft 365 suite

Trusted data security

- Offers real-time access to Microsoft Graph for generating responses ingrained in business content
- Navigates and delivers precise, contextually aware responses aligned with ongoing work
- Rests on Microsoft's comprehensive security, compliance, and privacy approach

3

What is Microsoft 365 Copilot? (Continued)

Be Microsoft 365 Copilot ready

Before you can access Microsoft 365 Copilot, you must meet the following requirements:

- Microsoft 365 Copilot requires a prerequisite base license assigned
- Microsoft Entra ID-based account required for authentication
- OneDrive account that enables Copilot to collaborate on content
- Microsoft 365 Apps must be deployed

4

Explore how Microsoft 365 Copilot works

Understands context and user needs

Excels in understanding user needs by analyzing content, gaining personal insights, and real-time monitoring.

Transforms how you work

Takes action through powerful search, natural phrasing with LLMs, and refined recommendations.

Offers key capabilities

Optimizes work efficiency through enhanced engagement, streamlined communication, and robust support for writing, presentations, data analysis, security, and user control.

5

Explore the core components of Microsoft 365 Copilot

LLMs

- Specialize in understanding and generating human-like text
- Operate as generative AI, producing new content
- Provide the engine that drives Copilot capabilities
- Privately hosted on the Azure OpenAI Service

Natural Language Processing (NLP)

- Key AI technology for machines to understand, interpret, and respond to human language
- Components include Tokenization, Semantic Analysis, Sentiment Analysis, and Language Translation

Microsoft 365 Apps

- Collaborate seamlessly with Copilot, enhancing user support across the entire Office Suite
- For example, Microsoft 365 Copilot in Word specifically assists users in the process of creating, comprehending, and editing documents

13

How Copilot Chat works

Integration of data sources

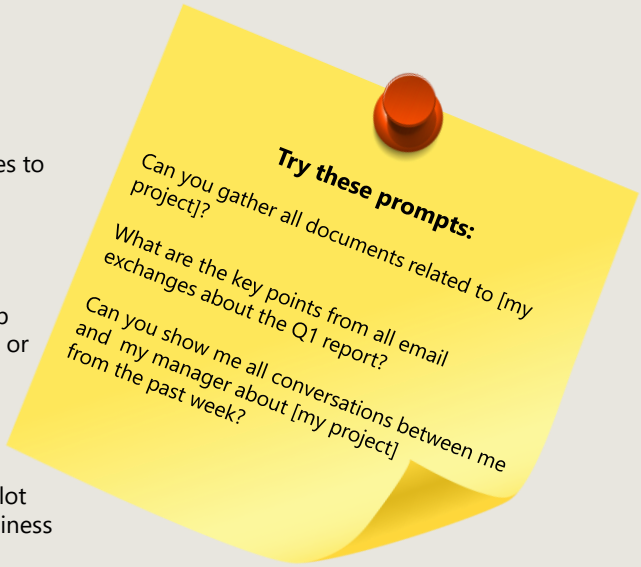
Copilot Chat integrates data from various sources to create a unified information hub for users.

Contextual insights

Copilot Chat provides contextual insights to help users make informed decisions during meetings or document preparation.

Efficiency in communication

By integrating and organizing information, Copilot enhances the efficiency and effectiveness of business communication.



© Copyright Microsoft Corporation. All rights reserved.

14

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

Continuous improvement

Learning from interactions

Copilot Chat learns from user interactions to improve its accuracy and personalization over time.

Feedback integration

User feedback is essential for Copilot Chat to refine its responses and enhance user experience.

Adaptive assistant

The more you use Copilot Chat, the better it adapts to your communication style, becoming an effective assistant.

15

Work mode vs. web mode – what's the difference?

Work mode

Grounded in work data

In work mode, Copilot Chat utilizes your Microsoft 365 data for personalized responses and task management.

Task management

Copilot Chat enables you to manage and complete various tasks related to your work effectively.

Collaboration tools

Collaborate with colleagues using tools like email, documents, and calendar management directly within Copilot Chat.

Web mode

Web mode functionality

Web mode utilizes the Bing search index for real-time data, facilitating research and resource discovery.

Seamless workflow transition

The design allows easy switching between work tasks and web-based information, enhancing productivity.

Security and compliance

Both work and web modes provide enterprise-grade security, ensuring data privacy and compliance with regulations.

How can I use Copilot Chat in work mode?

Possible use case prompts

Help me prepare for my meeting by summarizing emails and chats with [a name]

Summarize all emails and Teams chats in the past day. Highlight the primary asks and open items.

Draft a message to my team with the current status of [project name] based on the emails and Teams messages received in the last 48 hours.

What is the next milestone on [a project]? Are there any risks? Help me brainstorm a list of potential mitigations for these risks.

Streamline communication

Copilot Chat helps streamline your communications, making it easier to manage messages and stay organized.

Summarize emails and chats

Use Copilot Chat to summarize emails and chats, ensuring you stay informed and prepared for your work.

Prepare for meetings

Prepare for meetings by using Copilot Chat to gather relevant information and summary insights from previous communications.

Draft updates

Generate updates for your team that summarize progress and project status with the assistance of Copilot Chat.

20

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

Benefits of web mode

Streamline your workflow

Copilot Chat enables users to streamline their workflow, making data-driven decisions easier and more efficient.

Summarize and analyze data

With file uploads, users can analyze data in Excel or summarize documents in Word, enhancing productivity.

Enterprise-grade security

Copilot Chat ensures enterprise-grade security with encryption, protecting your information both in transit and at rest.

29

Where do I start?

From scratch

Use the on-canvas Copilot or Copilot Chat experience to draft a new presentation. Provide a basic prompt, or an outline to create comprehensive slide decks, including speaker notes and references.

From a template

Start with a Microsoft theme or template or use your own existing presentation to maintain a consistent, professional look. Using a template or theme allows you to focus on the content rather than the design of your presentation.

From a file

Reference a Microsoft Word document as you create your presentation to automatically generate a presentation that reflects the content and structure of your document.

© Copyright Microsoft Corporation. All rights reserved.

30

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

Start a new presentation from scratch

Select from the suggested prompts

Copilot in PowerPoint presents prompt suggestions that you can use to begin your draft.

Enter your own prompt

Using the prompt box, you can tell Copilot your exact needs.

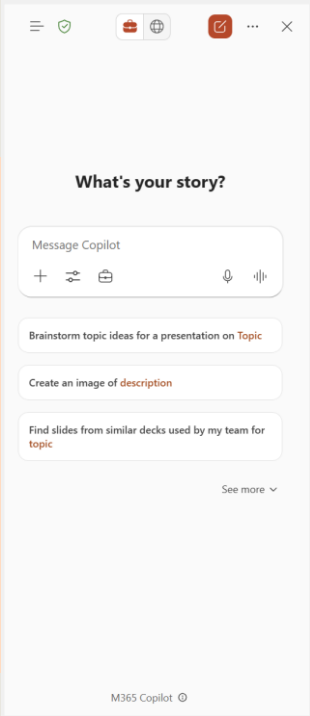
Sample prompts

Create a presentation on the benefits of remote work.
Generate a presentation about the latest trends in digital marketing.
Design a presentation on the impact of artificial intelligence in healthcare.
Create a presentation on the importance of cybersecurity in the modern workplace.
Generate a presentation about sustainable business practices.

Be specific & reiterate

The more details you provide in your prompt, the better Copilot's response can be.

© Copyright Microsoft Corporation. All rights reserved.



31

Start with a template

Microsoft templates

To start, launch PowerPoint and select a pre-configured Microsoft Template. When you enter your prompt, Copilot keeps the formatting defined in the template file.

Your own template or file to use as a template

In the same way, you can open your corporate template, or a PowerPoint presentation on which you want to model the new one.

Sample prompts

Alternately, you can prompt Copilot in PowerPoint to develop a presentation based on a template file. Enter:

- Create a new presentation using the /Company Overview Template.pptx file.
- Generate a presentation based on the existing PowerPoint file /Q1 Financial Results.pptx

43

Use Copilot in Word to create an executive briefing report

As the COO at Northwind Traders, I need you to create a strategic briefing report for our Senior Leadership Team that's based on the company's Q3 sales performance data, which can be found in the attached Northwind Traders Q3 sales data.xlsx file. This file contains detailed sales data for our Q3 performance this year, along with year-over-year growth percentages for Q3 revenue and profit by category and region. Please create a professional executive briefing report in Word that summarizes Q3 sales trends and highlights emerging opportunities and potential risks. The format of the report should include an executive summary, a bulleted list of key insights (including top-performing categories and regions, areas with declining performance, and emerging opportunities), and a clear year-over-year analysis (including charts) of revenue and profit growth by category and region.

North America	-$51,864	-$164,529	-$112,665

45

Use Copilot Chat to define the project framework

Summarize Boulder Innovation's 'Network Modernization and Security Upgrade' project using the attached documents. Create a concise framework for leadership that covers: purpose and scope, top objectives, key deliverables, milestones, risks, and stakeholders. Cite your sources (file names and dates) and note any conflicting details. Present the summary in short sections and bullet points, followed by an appendix that maps each section to its sources.

Use Copilot in Excel to analyze new product line COGS

I'm a financial analyst for Fabrikam. I was asked to analyze the EcoSmart COGS Estimates spreadsheet for Fabrikam's new EcoSmart product line. Can you please review the dataset in this spreadsheet and provide two things in a new sheet: (1) a clear description of each key column and its purpose, and (2) a list of any missing or inconsistent data points that could affect accuracy. Present your findings in a concise, structured format in a new sheet.

© Copyright Microsoft Corporation. All rights reserved.

47

Use Copilot in Excel to identify key manager metrics

Summarize the dataset in Contoso_HR_ManagerMetrics.xlsx and identify which HR metrics most strongly indicate manager effectiveness. This task is part of an HR review at Contoso to evaluate manager strengths and development opportunities, such as high attrition or low training completion. Use the columns provided in the file (Engagement Score, Attrition Rate, Training Completion, Average Team Tenure, Internal Promotions, Performance Rating). Present the results in a clear, concise table with actionable insights that can be included in a report.

Use Copilot in Whiteboard/Word to brainstorm project plan ideas

I'm the Operations Manager at Adatum Corporation. Our 50-year-old office building has a failing boiler, and I need to evaluate options for repair or replacement. Before starting the installation process, I want to brainstorm and organize the typical steps companies should follow when installing a new boiler system. Using your expertise, please suggest a comprehensive list of actionable steps for a successful boiler installation project.

© Copyright Microsoft Corporation. All rights reserved.

49

Use Copilot in Word to develop a strategic communication brief

I'm the Communications Manager for Boulder Innovations. The company is preparing to launch AuroraHub, a new internal communications platform designed to streamline messaging, increase employee engagement, and provide real-time insights into communication effectiveness across a large, distributed workforce. Using the attached AuroraHub Product Overview document as your primary source, draft a strategic communication brief for Boulder's executive leadership team. The brief should:
- Introduce the AuroraHub platform and its purpose
- Clearly explain its key features and benefits
- Show how AuroraHub aligns to Boulder Innovations' strategic goals and values
- Describe the expected business impact, including engagement, transparency, and communication effectiveness

Write in a concise, professional tone appropriate for executive stakeholders. Organize the brief with clear headings and short sections, focusing on clarity, relevance, and strategic value rather than technical detail.

Use Copilot's Researcher agent to identify external trends and proof points

- Safety communication practices for energy/utility field teams
- Regulatory reporting/ESG (for example, green house gasses and safety incidents)
- Change adoption in shift-based workforces
- Mobile access and low-bandwidth considerations
- Crisis/incident communication patterns,
- Employee sentiment drivers in the energy sector

© Copyright Microsoft Corporation. All rights reserved.

51

Use Copilot in Excel to analyze communication metrics

- summarize trends in the open spreadsheet and identify any departments with below-average engagement and display the results in a new sheet.
- add a bar chart that compares open and click-through rates by department. Ask it to display the results in a new sheet.
- rank the departments based on their click-through rate and then highlight the top three and bottom three departments and it to display the results in a new sheet.
- create a short summary for the executive leadership team regarding overall departmental engagement. Indicate the average open rate across all departments, the average click-through rate, and identify the departments with below-average engagements. Ask Copilot to also provide some suggestions on how we can improve open and click-through rates for low-performing departments. And display the results in a new sheet.
