What is generative AI?

Generative AI is an exciting branch of artificial intelligence designed to produce brand-new content—like images, videos, text, or even audio—just from a simple description.

It's designed to help you:

- Generate content with simple prompts.
- Generate realistic images from textual prompts.
- Create videos or animations based on scripts.
- Write articles, reports, or summaries.

As a business user, generative AI can help you with:

- **Content creation**: Writing blogs, creating social media posts, or designing promotional materials.
- **Task automation**: Generating reports, summarizing meeting notes, or drafting contracts.
- **Customer interactions**: Enhancing chatbots with natural language responses or personalizing customer communications.

3

How does generative AI work?

Learning from Large Datasets

Generative AI models learn patterns from vast amounts of data to generate accurate content. This learning enables understanding of complex inputs.

Classification vs Generative Models

Classification models categorize information, while generative models create new content based on input prompts. Both serve different AI functions.

Human Language Understanding

Generative AI replicates human language, making interactions natural and accessible for users with various technical skills.

User-Friendly Tools and Templates

Prebuilt AI tools and templates simplify use, allowing business users to leverage AI without programming knowledge.

Responsible AI in Microsoft 365 Copilot

Secure and ethical tools:

- Grounded responses
- Content moderation
- Privacy by design

Data Privacy:

- Encryption and data isolation
- Access controls
- Regional compliance
- Enterprise Data Protection
- Microsoft Purview

Human oversight:

- Avoid overreliance
- Recognize potential prompt injections
- Monitor AI outputs
- Decision validation
- Feedback mechanisms

Generative AI and Microsoft 365 Copilot

Microsoft 365 Copilot is an AI assistant integrated into apps like Word, Excel, and Teams, using Large Language Models and Microsoft Graph to access organizational data such as emails and calendars.

This combination enables Copilot to:

- Generate new content (emails, documents, presentations)
- Summarize meetings and chats
- Analyze data and visualize insights
- Automate workflows and repetitive tasks
- Support decision-making with contextual recommendations

Understand the basics of Microsoft 365 Copilot Chat

Microsoft 365 Copilot Chat is an enterprise-ready AI chat available at no extra cost to your Microsoft 365 subscription.

It integrates AI into your Microsoft 365 apps to automate tasks, streamline workflows, and deliver insights using both web-grounded and work-grounded data.

Copilot Chat includes:

- Secure, AI chat grounded in the web and powered by GPT-4 or GPT-5.
- Agents accessible right in the chat interface
- IT controls, including enterprise data protection and agent management
- Features like Copilot Pages, Notebooks, file upload, and image generation

Copilot Chat's features becomes even more powerful with a ***Microsoft 365 Copilot license*** in addition to your standard Microsoft 365 subscription.

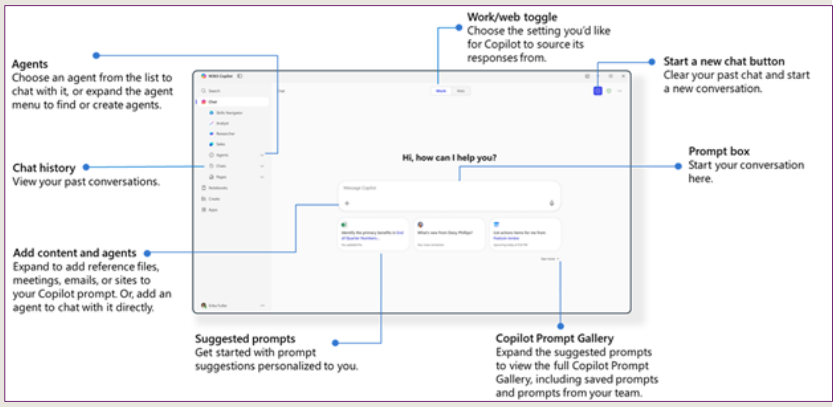
9

Access Copilot Chat

Important: You must sign in using your work email account.

Copilot Chat is accessible through:

- Microsoft 365 Copilot app
- the web (www. m365copilot.com)
- Microsoft 365 apps
- Microsoft Edge browser



© Copyright Microsoft Corporation. All rights reserved.

10

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

The difference between work and web-grounded modes

Copilot Chat uses web data by default. With a Microsoft 365 Copilot license, it can also access your work data, which is why you'll see both **Work** and **Web** tabs in the interface.

In **work mode (work-grounded),** Copilot Chat uses Microsoft Graph to ground responses in your organizational data, giving you access to files, emails, meetings, and other Microsoft 365 resources.

In **web mode (web-grounded),** Copilot Chat uses Bing's web data with generative AI to provide up-to-date insights for research, brainstorming, and staying informed.

11

How to chat in 3 steps

1. Enter your prompt

Enter your detailed prompt in the text box at the bottom. If you would like Copilot to source information from any reference files, you can upload them in your prompt by selecting the "Add content" button.

2. Check sources

Copilot Chat is transparent about the sources of its information. See these sources listed underneath the answer.

Vet these sources and validate your answers.

3. Continue the conversation

You can ask follow-up questions as you would in a conversation. You can refine the answer too.

For example, try "Write a shorter answer" or "Give me more detail." You can also select suggested prompts.

Copilot Memory and Search

Copilot Memory

- Set your preference and work context once. Copilot applies them automatically in future responses.
- Manage your memories any time in Coplot settings.
- Use Temporary Chat for one-offs conversations – nothing is saved.
- Organization admins manage Memory settings to ensure compliance and privacy.

Copilot Search

- Available from Chat, Search focuses on discovery.
- Leverages Microsoft Graph to understand your work context and permissions.
- Shares the same security and compliance framework as Chat, so your data is protected..

13

Understand the basics of Copilot prompts

A Copilot prompt is a **question or instruction** you give to Copilot to help you get work done.

An effective prompt has four components:

- Context
- Goal
- Source
- Expectations

Prompting best practices

- ✓ Be clear and specific
- ✓ Keep it conversational
- ✓ Give examples
- ✓ Ask for feedback
- ✓ Write legibly
- ✓ Check for accuracy
- ✓ Provide details
- ✓ Be polite
- ✓ Iterate and refine

- ✗ Be vague
- ✗ Request inappropriate or unethical content
- ✗ Use slang, jargon, or informal language
- ✗ Give conflicting instructions
- ✗ Interrupt or change topics abruptly

17

Apply Copilot prompts to common business scenarios

Draft emails:

"Write an email congratulating the team on the successful project launch."

Create presentations:

"Generate a 10-slide presentation on quarterly sales performance."

Prepare for meeting:

"Based on my prior interactions with [/person], give me five things likely top of mind for our next meeting."

Organize your time:

"Review my calendar and email from the last month and create 5 to 7 buckets for projects I spend most time on, with % of time spent and short descriptions."

Forecast sales data:

"Generate a visual forecast of next year's sales using historical sales data trends, highlighting seasonal patterns, growth projections, and potential anomalies."

Visualize top insights and trends:

"Generate a visual forecast of next year's sales using historical sales data trends, highlighting seasonal patterns, growth projections, and potential anomalies."

Add references to your prompts

Symbol	Use Case	How to Use	Example Prompt
/	Reference a file or folder	Type / followed by the file or folder name to link directly to it	"*Summarize the key points from /Q4MarketingStrategy.pptx*"
#	Reference a topic or meeting	Use # to tag a topic, meeting name, or recurring event	"*What were the action items from #WeeklyOpsSync?*"
@	Mention a person	Use @ followed by the person's name to include their perspective or input	"*Summarize the feedback from @John Smith on the latest draft*"

19

What are agents?

Agents in Copilot Chat are specialized AI assistants that automate tasks, answer questions, and streamline business processes across apps like Word, Excel, Outlook, and Teams.

How to access pre-built agents:

- Available in Copilot Chat interface (browser or app)
- Browse prebuilt agents in the **Agent Store** (from Microsoft, partners, internal teams) such as Researcher and Analyst

Create your own agent

Custom agents let you tailor Copilot to your workflows. Design agents that understand your team's knowledge and respond in your preferred style. Select **Create Agent** in the **Agents** tab or left menu.

You can **describe** your agent or choose a template. Then, **configure** your agent by including:

- Details
- Instructions
- Knowledge
- Capabilities
- Suggested prompts

Draft business content with Microsoft 365 Copilot

Action	Description
Generate First Drafts from Prompts	Start a blank doc, email, or slide and let Copilot draft based on your prompt.
Refine and Enhance Text	Highlight text and ask Copilot to make it concise, formal, detailed, or expand points.
Create and Organize Lists or Tables	Generate lists, tables, or outlines for reports, presentations, or emails with Copilot.
Draft and Edit Emails Efficiently	Quickly draft invitations, follow-ups, or summaries in Outlook using Copilot.
Build and Refine Presentations	Create or improve slides in PowerPoint with better visuals, transitions, and text clarity.
Add New Sections or Summaries	Insert summaries, conclusions, or key points into documents or presentations via Copilot.
Apply Formatting and Styles	Use Copilot to apply consistent formatting and styles for professional content.

Start a new presentation

Select from the suggested prompts

Copilot in PowerPoint presents prompt suggestions that you can use to begin your draft.

Enter your own prompt

Using the prompt box, you can tell Copilot your exact needs.

Sample prompts

Create a presentation on the benefits of remote work.
Generate a presentation about the latest trends in digital marketing.
Design a presentation on the impact of artificial intelligence in healthcare.
Create a presentation on the importance of cybersecurity in the modern workplace.
Generate a presentation about sustainable business practices.

Be specific & reiterate

The more details you provide in your prompt, the better Copilot's response can be.

26

Microsoft Word

- *Write a proposal for a new flavor in the Fourth Coffee latte lineup.*
- *Write an article on the importance of creating work/life balance.*
- *Write a white paper about project management.*
- *Write a job offer letter for a sales position at Contoso. The start date is August 1st, and the salary is $60,000 per year plus bonuses.*

27

Prompt examples

Prompt	Prompt Type	Potential Output
Summarize this document.	Generic Prompt	A brief summary that may miss some key points or nuances of the document.
Summarize the key points of the first three sections of this document, focusing on the main objectives and outcomes discussed.	Detailed Prompt	A comprehensive summary that highlights the main objectives and outcomes of the first three sections, providing a clearer understanding of the document's content.
Rewrite this paragraph.	Generic Prompt	A rephrased version of the paragraph that may not fully capture the intended tone or emphasis.
Rewrite this paragraph to make it more formal and emphasize the importance of the project's timeline.	Detailed Prompt	A rephrased paragraph that is more formal and clearly emphasizes the importance of the project's timeline, aligning better with the intended tone and focus.

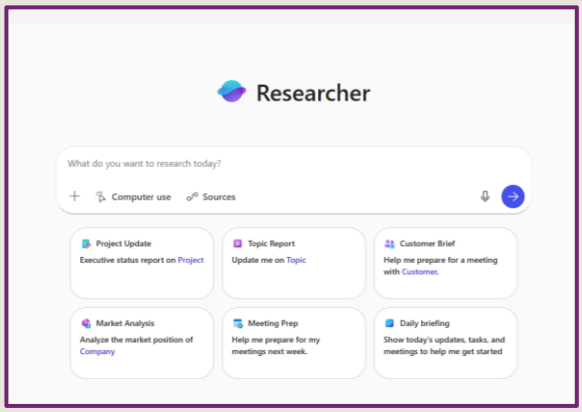
35

Researcher agent

What is the Researcher agent?

An **intelligent assistant** built into Microsoft 365 Copilot that helps gather, analyze, and summarize information from both your work content and the web.



36

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

Prompt using the Researcher agent

Open
- Select the Researcher agent in Copilot Chat

Prompt
- **Research the latest trends in AI for retail and draft a market analysis report based on competitor data.**

Refine
- Refine the scope with follow-up prompt
- **Using your previous response as a baseline, produce a tighter market analysis[Region][Timeframe, e.g., 2024–2026]**

Define
- Choose and output format: slides, summaries, or emails.
- You could prompt: **Write an executive summary for this report.**

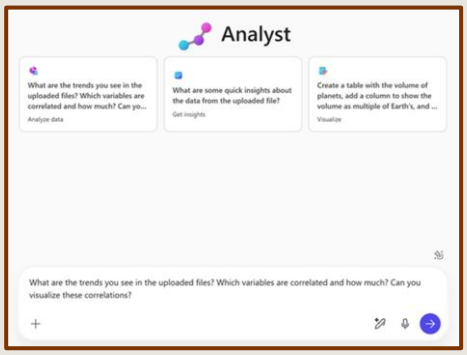
37

Analyst agent

What is the Analyst agent?

An **intelligent assistant** built into Microsoft 365 Copilot that helps analyze data, identify trends, and generate visual reports from sources like spreadsheets and cloud storage.



38

© Microsoft Corporation. All rights reserved. MICROSOFT MAKES NO WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, AS TO THE INFORMATION IN THIS PRESENTATION.

Prompt using the Analyst agent

Open
- Select the Analyst agent in Copilot Chat
- Attach files: Excel, CSV, JSON, PDF, etc.

Prompt
- **Highlight the key sales trends by region and quarter.**

Refine
- Refine the scope with follow-up prompt
- **Visualize sales growth over the past four quarters**

Define
- Choose an output format: bullet points, executive summaries or email-ready updates.
- You could prompt: **Summarize findings into three bullet points for a leadership slide.**
